width!

Turn & Go feature for extremely narrow stairs

Handicare is delighted to introduce the Turn & Go; a new option that is available for use with the Van Gogh and Rembrandt track. Turn & Go means you can now install a curve stairlift on stair that are only 69cm* wide so you help make everyday life easier for even more people.

Turn & Go combines the Classic, Elegance and Alliance seats with a powered swivel at the top and bottom of the stairs. The user can travel at an angle of 70° to the track which means the stairlift can operate in less space making it suitable for particularly narrow staircases.

How does Turn & Go work?

If sitting down at the bottom of the stairs your customer activates the joystick in an upward direction. The automatic swivel function will then swivel the seat to an angle of 70°, turning the customer to face the ground floor, with their back to the stairs, before starting to travel upwards.

At the top of the stairs, the customer keeps the joystick engaged to swivel the seat to a neutral position, allowing the customer to get off safely. In order to allow for a safe dismount on the landing a minimum overrun of 50cm is required with all Turn & Go installations.

When going downstairs, the seat will first swivel to the turned position before setting off. Users should be aware that with Turn & Go they will face downstairs when using the stairlift and, when parked, the seat will remain in the 70° swivelled position.

Suitable for narrow stairwells

Turn & Go gives you the opportunity to offer a range of seats (Classic, Elegance and Alliance) with a powered swivel for use in homes with staircases as narrow as 69cm.

Seat Comparison

		Turn & Go (70°) Classic/Elegance/ Alliance	Downward Facing Seat (45°)	Standard Seat Position (90°)
Minimum width of stairs*	Van Gogh	69 cm	69 cm	74 cm
Minimum width of stairs*	Rembrandt	77 cm	77 cm	77 cm
Automatic swivel		Yes	No	Option
Manual swivel		No	Yes	Yes
Offset footplate		Yes	Yes	Option

*The above dimensions are based on a thigh length of 60 cm.
